RE: URGENT Request for Accommodation under Americans with Disabilities Act to Eversource Board of Trustees

Dear Ms. Williams,

Under the Americans with Disabilities Act, I am writing to request your urgent assistance as a member of the Board of Trustees at Eversource in breaking through Eversource bureaucracy that has led to catastrophic health consequences for me. I am a Retired State Employee, who became chemically injured while working for the State of Connecticut decades ago. I was subsequently diagnosed with Chemical and Electrical Sensitivity which forever changed my life. This disability required me to make significant modifications to my home to reduce exposure to chemicals and Electro-Magnetic Radiation in all forms, including from wiring and everyday devices and appliances. While things were very difficult and challenging, I was surviving. Everything changed, however, on May 3, 2022, when Eversource switched out my analog meter for an Itron Centron C1A-3B broadcasting digital meter, resulting in a near-immediate, catastrophic decline in my health. The attached two letters from my Medical Doctor affirm this decline.

You are my last hope as PURA, the CT Office of Consumer Counsel and the Connecticut Attorney General's office all state that only Eversource can make this right. **I am asking you to contact Chris Kellogg, Manager of the Meter Technical Group or Joe Nolan, CEO at Eversource to either (a) provide me with an analog/electromechanical meter OR (b) apply a shunt and bill me using estimated usage.**

The new meter that was installed on May 3, 2022 not only pulses Radio-Frequency Radiation every 30 seconds, 24 hours per day, but induces Harmonics and Micro-surge Electrical Pollution onto the electrical wiring throughout my entire home. While some may argue that the new meter is identical, or nearly identical, in output to the analog meter previously installed at my home, these two meters are in no way identical, as the images on the following page demonstrate.

My life has been severely disrupted by the installation of the new digital meter. For over eight months I have been physically deteriorating and unable to meet many financial obligations and deadlines. I am asking for your help in accommodating my disability so that I may begin the healing process in my own home, however long that may take.

If you have any questions, I may be reached via post at 10 Susan Drive, Stafford Springs, CT 06076 or 860.684.2850. (Please note that my ability to speak on the phone is limited.) Thank you for your prompt attention to this urgent request.

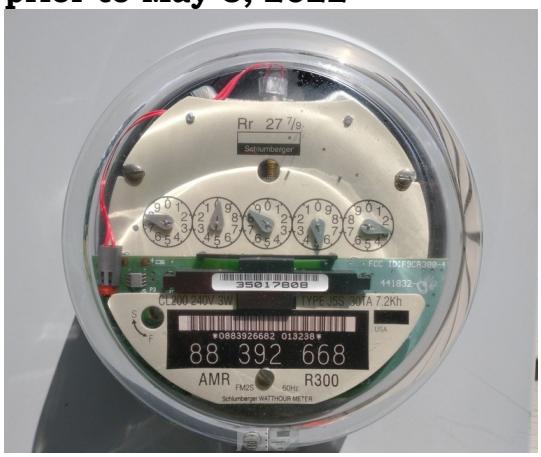

Sincerely,

Lily Marie Sinnamon
